

Stonewall Springs Reservoir Complex

Triview Metropolitan District
Substantially Complete June 1, 2024

Project Description

The Triview Metropolitan District's Stonewall Springs Reservoir Complex consists of three planned reservoirs: South, Central and East Reservoirs located 10 miles east of Pueblo. This Project consisted of the construction of a diversion structure; inlet channel; spillway; remote telemetry and monitoring equipment; installation of a pump station system from the Arkansas River; a SCADA system for the diversion structure; and outlet works for the South Reservoir. The Project will support the replacement of non-renewable Denver Basin groundwater supplies with renewable surface water supplies.

The Reservoir has a 2,050 acre-foot capacity and is located 10 miles east of Pueblo. The outlet from the reservoir will discharge into the Arkansas River above the Avondale gage. Construction was completed in late 2023.
