C-TR-11

NOTICE OF PROPOSED DECISION

The Colorado Division of Reclamation, Mining and Safety proposes to Approve Technical Revision Application No. 17 (TR-17) for the Carbon Junction Mine (Permit No. C-1992-080), submitted by Oakridge Energy, Inc. With this application, the operator seeks to revise the permit to address the as-built condition of the Carbon Junction Permanent Diversion and to incorporate designs for reestablishment of the Upper Carbon Junction Channel. This revision has been submitted as required for partial abatement of Notice of Violation No. CV-2013-005.

The Carbon Junction Mine is a Surface coal mine located in La Plata County, approximately 2 miles SE of Durango, Colorado. Coal interest is Private, and the surface affected is Private land. The permit area encompasses approximately 164.19 acres.

This proposed decision is based on a finding that the proposed operation will comply with all requirements of the Colorado Surface Coal Mining Reclamation Act, Section 34-33-101, *et seq.*, C.R.S., and the regulations promulgated thereunder.

Copies of the proposed decision, including stipulations, are on file for public inspection at the Colorado Division of Reclamation, Mining and Safety, Room 215, Centennial Building, 1313 Sherman Street, Denver, Colorado 80203. Persons with an interest that may be adversely affected by the proposed decision may request a formal hearing before the Mined Land Reclamation Board on the proposed decision. Such request must be made within ten (10) days of the initial publication of this notice, must be in writing, and must state with reasonable specificity the reasons for the request and the objections to the proposed decision.
