**Re: 32 Road Pit, Permit No. M-1985-219, Technical Revision Preliminary Adequacy Review,
Technical Revision No. TR-3**

Dear Mr. Parkerson:

The Division of Reclamation, Mining and Safety (DRMS) has reviewed the application for a technical revision, TR-3, for the above referenced 112 permit. The purpose of the technical revision is to revise to topsoil stockpile seed mix. A review of the request has revealed a few issues and clarifications that need to be addressed.

- *Please specify the rate of the seed mix to be applied to the topsoil stockpile in pounds Pure Live Seed (PLS) for each component of the proposed seed mix.*

The technical revision cannot be approved until the issues are adequately addressed. Please submit a response to the issues as soon as possible but no later than November 22, 2013, so the decision date of November 27, 2013 can be met. If your response, or a written request for an extension of the decision date, is not received by November 22, 2013 then the request for the revision may be denied.

If you have any questions, please contact me at (970) 241-2042.

Sincerely,

A handwritten signature in black ink, appearing to read "Travis Marshall".
