RE: Penrose Ranch Permit # M1992-016  
Technical Revision

Tim,

Rocky Mountain Materials would like to request a Technical Revision for our Penrose Ranch operation. Currently, this operation is permitted for 100 acres of disturbed area. Following the Divisions review of the site, it was determined that the disturbed area needs to be increased to a maximum of 200 acres to allow more time for the establishment of adequate reclamation. Because of the lack of moisture over the past few years, it has been difficult to establish reclamation that was suitable for release. With this increase in acreage, we will be able to continue mining while continuing to work on concurrent reclamation to return the site to agricultural uses.

We appreciate your consideration of this revision to our mining plan.
