Tim,

Attached is our response to the adequacy review for the Penrose Ranch operation. The original has been mailed to you.

Thanks,

Tom

Re: Penrose Ranch Permit M- 1992-016
Technical Revision Adequacy Review TR01

Tim,

In response to the adequacy review for this technical revision, the additional 100 acres will be to allow enough time to establish acceptable re vegetation for the reclaimed areas. Your assumption that the area will be graded and seeded is correct and will only require bonding for reseeding and mulching if necessary. The original 100 acres will remain the same as it has in the past.

We will submit the additional bonding as soon as I receive the approval for this revision and we will be working on the Divisions recommendations for the release of the approved areas in the near future.

Please contact me at 719-473-3100 if you need any further information.
