**RE: Yule Marble Quarry, Permit No. M-1999-058, Technical Revision (TR-3) Adequacy Review**

Dear Mr. Lewicki:

On January 21, 2014 the Division of Reclamation, Mining and Safety (Division) received the technical revision request (TR-3) for the Yule Marble Quarry permit. The operator wishes to add new portals #6 and #7 to the mining plan. TR-3 also includes updated site maps that show a reconfigured permit boundary. During the initial adequacy review the following issues were identified by the Division that must be adequately addressed before approval of TR-3 can be considered:

1. The technical revision fee of \$216 was not submitted.
2. A portion of the proposed permit area lies within the Yule Lode property owned by the McIntyre's. Please provide the Division with documentation showing that the operator has a legal right to conduct operations on the Yule Lode property.
3. Page 15, 3<sup>rd</sup> paragraph of the TR-3 submittal references a letter from OMYA that is attached to the application. The Division was unable to locate the referenced letter in the submitted material. Please provide the letter.

If you require additional information, or have questions or concerns, please contact me at the Division's Grand Junction Field Office.

Sincerely,

A handwritten signature in black ink, appearing to read "Dustin Czaplak", written over a horizontal line.

Dustin Czaplak
