Regarding: Technical Revision

Permittee: Ephemeral Resources, LLC
Permit #: M-2002-046
Operation Name: D Road Gravel Pit
Anniversary Date: April 16, 2013

RECEIVED

JAN 30 2014

DIVISION OF RECLAMATION
MINING AND SAFETY

Travis,

Ephemeral is requesting technical revision to the above permit.

- A. Ephemeral is asking for a change in the mining sequence for the pit. Originally the permit called for the sequencing of the Areas to be A, B, C, D, E, and F. At this time Area's A has been mined and Area B will be finished this spring. Ephemeral is proposing to go into Areas E and F next, mining them concurrently, then mine C, D.
- B. Ephemeral is currently in a bond recalculation and with the change in the mining sequence Ephemeral would like to also clarify the bond. Area C will not be mined next and only would require seeding. Due to slower business levels Areas E and F will not be disturbed in the near future. Ephemeral is requesting no bond calculation for these areas and Ephemeral will give a 60 day notice prior to mining in these areas. At this time Area B has 75% of all sloping and top soil replacement completed and area C will not be mined in the near future but would still require reseeding only.

I've enclosed a check for \$216.00.
