**Re: Hansen Uranium Project, DRMS File No. P-2009-025
Baseline Hydrologic Monitoring Plan (prepared by Whetstone Associates, Inc.,
dated January 29, 2014)**

Mr. Siglin:

The Division of Reclamation, Mining and Safety has reviewed the above-referenced baseline monitoring plan. Our review focused on the adequacy of geographic and stratigraphic coverage, sampling procedures, analytes, and sampling frequencies. The plan appears adequate for characterizing baseline conditions in the vicinity of the project. Thank you for the submittal.

Sincerely,

A handwritten signature in black ink that reads "Tom Kaldenbach".

Tom Kaldenbach
Senior Environmental Protection Specialist
