Re: 23 Road Pit, Permit M-1979-089, Preliminary Adequacy Review, Technical Revision TR-6

Mr. Lyman,

The Division of Reclamation, Mining and Safety reviewed your Technical Revision application **TR-6** and requires additional information regarding the following issue(s):

- Please clarify the amount of time required to backfill the proposed "hole" proposed for excess and waste concrete.
- Due to the exposed ground water at the site is a new well permit to account for evaporative loss required by the new property owner?

The technical revision cannot be approved until the issues are adequately addressed. Please submit a response to the issues as soon as possible but no later than March 3, 2014, so the decision date of March 6, 2014 can be met. If your response, or a written request for an extension of the decision date, is not received by March 3, 2014 then the request for the technical revision may be denied.

If you need additional information, please contact me at the Division of Reclamation, Mining and Safety, Grand Junction Field Office, 101 S. 3rd St., Suite 301, Grand Junction, Colorado 81501, telephone no. (970) 241-2042.

Sincerely,

Travis Marshall
Environmental Protection Specialist
