DIVISION OF RECLAMATION
MINING AND SAFETY

March 28, 2014

Mr. Eric Scott
Division of Reclamation, Mining and Safety
1313 Sherman Street, Room 215
Denver, CO 80203

RE: M-1979-191, Follow up to inspection dated July 17, 2013

Dear Mr. Scott:

Please accept this letter as our response to the problems noted in your recent report.

- 1) Permit amendment will need to be submitted within 6 months to change the post mining land use to accommodate the change to lined water storage, and to revise the permit boundary to incorporate all disturbances associated with mining activity. DRMS acknowledges that these disturbances appear to be shown and approved on the 1979 mining plan; therefore the Division will not pursue enforcement for area affected outside the permit at this time.

Please accept this letter as our request to extend this deadline to May 31, 2014.

After numerous meetings with the property owners, we have a reclamation plan that is acceptable to the property owners and balances the material at the site so we don't have to import or export any fill. The compacted liner has been designed and the mining and reclamation plans are basically completed. We are asking for additional time to develop the remaining exhibits (ground water monitoring and mitigation plan, new permanent manmade structure agreements, stability analysis and any other remaining modifications).

Please give me a call at (970) 227-4041 with any questions or concerns.

Sincerely,

Julie Mikulas
Land Manager
