DRMS FILE #M-2004-030

Michael, T Bone Stone /Bill Tenore is asking the Mine land Reclamation Board for an extension until January 2, 2015 to get the new reclamation bond in place. The reason for the delay in getting the bond in place was mostly the September, 2013 flood in Lyons where our business and quarry is located. We were all greatly affected personally as well as our businesses by this act of Nature. My bank and the other bank in Lyons that I was working with to secure the bond were also affected and closed for a while; one even closed permanently which caused a serious time delay. In the mean time my bank decided not to do letters of credit for quarries that need a performance bond like my current bond that is in place now. There was also a significant increase in the bond amount per acre. The current bond that is needed is \$68,574.00 minus the one that is in place now \$22,200.00 that is about \$46,374.00 left. I have been talking to the financial warranty department at the state for new ideas and have come up with some different plans and am working on them presently. I should be able to rectify this financial warranty soon and have the bond in place by the first of the year or sooner.

Thank you in advance for consideration.
Sincerely,

Bill Tenore
