**The following inspection topics were identified as having Problems or Possible Violations. OPERATORS SHOULD READ THE FOLLOWING PAGES CAREFULLY IN ORDER TO ASSURE COMPLIANCE WITH THE TERMS OF THE PERMIT AND APPLICABLE RULES AND REGULATIONS. If a Possible Violation is indicated, you will be notified under separate cover as to when the Mined Land Reclamation Board will consider possible enforcement action.**

**INSPECTION TOPIC:** Acid And Toxic Materials

**PROBLEM/POSSIBLE VIOLATION:** Problem: Improper storage and containment of fuels and/or other hazardous materials was present on site.

**CORRECTIVE ACTIONS:** All storage tanks, petroleum and any hazardous materials on site for any period of time shall have appropriate secondary containment. The site will also have to comply with all applicable SPCC requirements. Please supply photo documentation that any fuel or hazardous materials containers are stored properly - including applicable secondary containment structures by the corrective action date. Note that secondary containment structures shall consist of an impermeable containment which could contain all contents of the tanks and various containers (when full) plus 10% of the total capacity. The operator may also provide photo documentation that all containers have been removed from the site on or before the corrective action date.

**CORRECTIVE ACTION DUE DATE:** 5/26/14

### **OBSERVATIONS**

This inspection was conducted as part of the normal monitoring program established by the Colorado Division of Reclamation, Mining and Safety. The WRC Gravel Pit is located approximately 13 miles west of Meeker, Colorado. The WRC Gravel Pit is a 191.83 acre 112c construction materials mining operation. Don Silva and Leif Joy accompanied the inspector during the inspection.

The mine identification sign and the affected area boundary markers were present and in compliance with Rule 3.1.12.

The site was inactive during the inspection. Various stockpiles of construction material were observed.

A waste oil container lacking secondary containment was observed within the permit area. This is noted as a problem. **The corrective action required is to construct secondary containment or remove the container from the permit area. Please provide photo-documentation of the corrective action no later than May 26, 2014 to avoid enforcement action.**

The operator has started the final grading for the solid waste disposal cell in Phase 1.

No off-site damage was observed during the inspection.

Photos that show the conditions observed during the inspection are included at the end of this report.
