Re: Kokes Gravel Pit, Permit No. M-1978-249, Receipt of 112 Construction Materials Reclamation Permit Amendment Application Package, AM-01, Incompleteness Letter

Dear Mr. Wright,

On June 5, 2014, the Division of Reclamation, Mining and Safety (Division) received your 112 Construction Materials Reclamation Permit Amendment Application package for the Kokes Gravel Pit, Permit No. M-1978-249. Preliminary review of the information received determined that the following items must be received before the Division can consider your application as being submitted and technical review can begin.

Please note that any changes or additions to the application on file in our office must also be reflected in the public review copy, which was placed with the Phillips County Clerk and Recorder by the Applicant.

APPLICATION FORM:

The question numbered 5.2 on the amendment application form was left blank. The Division understands that the only activity at the proposed mine site is reclamation, but please also indicate this on this question (e.g. "None-reclamation only").

The primary mine entrance location coordinates are required and need to be listed in the question numbered 10 on the amendment application form.

The certification page listed "Logan County Road & B" as the applicant/operator or company name and the notary listed it as "Logan County Road + Bridge", while "Logan County" was listed on the question numbered 1 as the applicant/operator or company name. The notification page will need to be updated and re-notarized to reflect the name change to just "Logan County".

EXHIBIT B - Index Map (Rule 6.4.2)

An index map showing the regional location of the affected land and all roads and other access to the area. A standard U.S. Geological Survey topographic quadrangle or equivalent is acceptable. Scale criteria need not be followed for this map.

Your application will not be considered submitted until the information listed above is received and found sufficient to begin our review. A decision date will be established 90 days from the date of receipt of all of the requested information. Additionally, if you have already published notice you will need to republish notice, after the Division considers the application submitted. This notice must be published once a week for four (4) consecutive weeks, starting within ten (10) days of the date your application is considered submitted. We will notify you when you

should initiate republication of your notice. The final date for receiving comments is the 20th day after the fourth publication or the next regular business day.

You have sixty (60) days from the above date to submit all necessary documents that the Office needs for an application to be considered filed. If, at the end of the sixty day period, the application has not been determined to be filed with the Office, the Office shall deny the application and terminate the application file.

The response due date is August 17, 2014.

This letter shall not be interpreted to mean that there are no other technical deficiencies in your application. The Division will review your application to determine whether it is adequate to meet the requirements of the Act after submittal of all required items.

If you have any questions, please contact me at 303-866-3567 x8132.

Sincerely,

Elliott R. Russell
Environmental Protection Specialist
