Hi Bob,

We have identified the proposed raise bore hole location as follows:

Please use the following coordinates (This is [Google Earth Coordinate System](#)).

Latitude: 37°58'10.36"N

Longitude: 107°46'30.08"W

If they ask **MINE Coordinate System** (in our mine drawings use this coordinates), then you have to tell them the following.

(X, Y, Z) or (East, North, Elevation) = (93698.338, 97037.596, 12171.771)

This is within a couple of hundred feet of the area marked on the mine map. When we were standing at L3 portal and looking down it is located on the second level of the tails benches on a pre-disturbed area where tails have been deposited.

Can you please provide us authorization to move forward with installing the raise bore hole in this location please? As you know timing is of the essence as we want to get started on this asap before the weather changes.

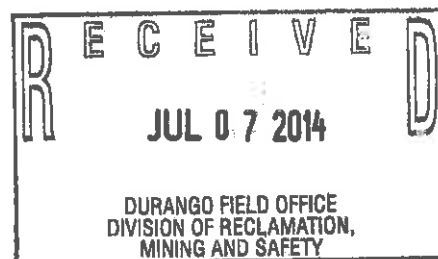

Best regards,

Dianna Stoopnikoff
