**Re: Lamar East Pit, DRMS Permit No. M-1977-572, Technical Revision Application (TR-04)
Adequacy Review-02**

Mr. Sutherland,

On August 15, 2014, the Division of Reclamation, Mining and Safety (Division) received your fee for the Technical Revision Application (TR-04), and the application was called complete on August 18, 2014. The new decision due date for this application is **September 17, 2014**.

There is one item from the Adequacy Review-01 that needs to be addressed before the Division can make a decision on your application. Please read the following comments and submit the requested information before the decision due date:

We received your updated Reclamation Plan Map that includes many of the requested changes. However, we require that the following feature be added to the map:

- 1.) slope gradients of reclaimed slopes

As recently discussed with the Operator, the map should include all slope gradients as they currently exist on site.

This concludes the Division's Adequacy Review-02. **If you are unable to provide satisfactory responses to any inadequacies prior to September 17, 2014, it will be your responsibility to request an extension of time to allow for continued review of this application.**

If you need additional information, please contact me at the Division of Reclamation, Mining and Safety, 1313 Sherman Street, Room 215, Denver, CO 80203, by telephone at 303-866-3567, extension 8129, or by email at amy.eschberger@state.co.us.

Sincerely,

Amy Eschberger
Environmental Protection Specialist

CC: Tom Kaldenbach, DRMS
