**Re: Bowie No. 2 Mine (Permit No. C-1996-083)
 Minor Revision No. 157 (MR- 157)
 Installation of VWP's at Gob Pile #3**

Dear Mr. Bear:

We have received your application for a minor revision to your permit to conduct coal mining in Colorado. Our initial review indicates that all preliminary items required by Rule 2.08.4(5) have not been submitted. Thus, your application is incomplete for the purposes of filing as of August 19, 2014.

The revision application is being deemed incomplete due to the following:

The application should include revised text, for incorporation into the permit application package, that describes the function and location of the piezometer installations, similar to the discussion of the Gob Pile #2 VWP's on page 19 of Volume IX.

The application should include a map that shows the location of the proposed piezometer installations, such as a revised Volume XI Figure 1.

In accordance with Rule 2.07.3(1), you have the opportunity to amend, review, or otherwise make your application complete.

If you have any questions, please contact me.

Sincerely,

Susan L. Burgmaier
