RE: Change in permit acreage to correct discrepancy in Division records

On July 17, 2014, the Division changed the permit acreage for this site in the permit system from 25.75 acres to 28.85 acres.

This change was made due to a discrepancy found in permit acreage reported during a sequence of revisions for this permit starting in 2003. After researching permit files, the Division determined the correct permit acreage based on the following three revisions:

Amendment (AM-02) approved 6/10/2003: added 7.35 acres to the existing 35 acres
New permit area: 35 acres + 7.35 acres = 42.35 acres

Technical Revision (TR-03) approved 10/23/2006: added 2.75 acres
New permit area: 42.35 acres + 2.75 acres = 45.1 acres

Acreage Reduction (AR-02) approved 4/10/2008: released 16.25 acres
New permit area: 45.1 acres – 16.25 acres = 28.85 acres

Conclusion: current permit acreage = 28.85 acres
