4. includes sufficient detail to identify and locate known prospecting features and facilities that may be affected and those that are not anticipated to be affected. This includes the location of all drill holes, mud pits, excavations, trenches, adits, shafts, tunnels, rock dumps, stockpiles, impoundments and prospecting roads. IT IS AN OLD ADIT W/ NO HISTORICAL WATER OR
FLOW OF WATER. SO THERE SHOULD BE NO ENCOUNTER
WITH GROUND WATER. THE NEAREST POTENTIAL WATER
WOULD BE A DRIED UP GULCH ABOUT 70 YDS TO THE NORTH.

IV. OPERATION AND RECLAMATION MEASURES:

1. The Board suggests that a photographic record of the pre-prospecting and post-prospecting conditions be kept by the prospector. These photos should be taken from the same location and by the same method to clearly show the pre-prospecting condition of the land and the reclamation efforts. Upon completion of reclamation and request for bond or surety release, the Board may consider the photos as evidence of adequate reclamation, and thus, be able to act more quickly on the request for release.
2. Provide a description of the native vegetation of the area to be disturbed, including tree, shrub, and grass communities of the area. Color photographs, sufficient to adequately represent the ecology of the site and adequately labeled (including date, orientation and location), may be used in lieu of a written description. Based on the quality of the photographs, the Division may require additional detail.

THE PROPOSED AREA TO BE DISTURBED DOES NOT HAVE
ANY VEGETATION OR TREES OF ANY SORT. IT IS A
HISTORICAL OLD MINE WORKING AND IS BARREN ROCK.
AT THIS POINT THE SITE IS COVERED IN SNOW BUT
YOU CAN SEE FROM THE SATELITE PHOTO THAT IT IS
BARREN OF VEGETATION. CURRENT PHOTOS WILL BE TAKEN
AS SOON AS IT IS CLEAR OF SNOW AND PRIOR TO ANY
WORK TO BE DONE.

8. Describe the estimated topsoil depth and how topsoil will be salvaged, stockpiled and redistributed for the re-establishment of vegetation. Specify approximate topsoil redistribution depth:

THE ONLY TOPSOIL IS COVERING THE "CAVED" PORTAL TO BE REOPENED. IT IS ROUGHLY TWO TO THREE FEET DEEP. IT WILL BE SET ASIDE IN A DESIGNATED PILE AND THEN REPLACED OVER THE OPENED AND LOCKED PORTAL. THERE IS NO VEGETATION GROWING ON THIS TOPSOIL AS WELL.

9. Describe how drill holes will be plugged (refer to Rule 5.4 of the Rules for required abandonment procedures):

THERE WILL BE NO DRILLING DONE ON THIS PROJECT.

10. Describe how portals, adits, shafts, ponds, excavations, or other disturbances will be reclaimed (refer to Rule 3 and Rule 5 for specific reclamation performance standards). You may wish to contact the Division for closure specifications.

THE PORTAL WILL BE LOCKED SECURELY AND THE REST OF THE SITE WILL BE RETURNED TO THE CURRENT STATE. THE TOPSOIL WILL BE PLACED ~~ON~~ BACK OVER THE CAVED PORTAL AND PUT TO A 2 1/2 TO 1 SLOPE.

11. Describe how roads will be reclaimed or returned to their pre-prospecting (or better) condition:

THE ROADS WILL ~~HAVE~~ HAVE BERMS WHERE REQUIRED AND DITCHES OR LATERALS FOR WATER FLOW. THEY WILL BE LEFT IN BETTER THAN CONDITION

12. List the seed mixture to be used in the re-establishment of vegetation. See the attached seed mixture calculation to obtain PLS/acre. For assistance with formulating seed mixtures and rates, contact the local NRCS if on private land, BLM/USFS if on public land or State Land Board if on state land.

A. Provide plant name and seeding rate

Plant Name	Seeding Rate (PLS/acre)

B. Describe the method for seed bed preparation, and application method for grass/forb seeding:

There should be any PRESEEDING NEEDED
AS THE CURRENT STATE OF THE SITE HAS
NO VEGETATION OR TREES.

V. TERMS AND CONDITIONS FOR PROSPECTING OPERATIONS:

3. Reclamation measures shall be fulfilled in a timely manner and completed within five (5) years of completion of prospecting activities.
4. The prospecting operations described in this Notice will be conducted in such a manner as to minimize surface disturbances. In addition to the measures required in Rule 5, precautions to be taken include:
 - A. Confinement of operations to areas near existing roads or trails, where practicable. Existing roads which are to remain as permanent roads after prospecting activities are completed shall be left in a condition equal to or better than the pre-prospecting condition;
 - B. Drilling shall be conducted in such a way as to prevent cuttings and fluids from directly entering any dry or flowing stream channel. Drill cuttings must be spread to a depth no greater than one-half (1/2) inch or buried in an approved disposal pit;

- C. Proper and timely abandonment of drill holes upon completion of drilling;
 - D. Reclamation of affected lands upon completion of operations or phases of an operation;;
 - E. Backfilling and revegetating any pits to blend in with the surrounding land surface;
 - F. Safeguarding mine entries, trenches and excavations from unauthorized entry at all times;
 - G. Disposal of any trash, scrap metal, wood, machinery, and buildings;
 - H. Control of noxious weeds within the area affected by the prospector
- 3. The prospecting operations shall be conducted in such a manner as to comply with all applicable local, state and federal laws and regulations including applicable state and federal air and water quality laws and regulations.
 - 4. The prospecting operations shall be conducted so as to minimize adverse effects upon wildlife to include covering of open drill holes until properly plugged.
 - 5. During the prospecting operations, the operator will perform the necessary stabilization and reclamation work to ensure those areas affected by prospecting activities are erosionally and geotechnically stable.
 - 6. All prospecting operations shall be in compliance with the Colorado Mined Land Reclamation Act, as amended (34-32-101 et seq. C.R.S.), and all rules and regulations currently in effect or promulgated pursuant thereto. See 2 CCR 407-1, Mined Land Reclamation Board Hardrock /Metal Mining Rules.

- 6. If on BLM land, the prospector will complete reclamation to the standards described in 43 CFR 3809.1-3 (d) and implement reasonable measures to prevent unnecessary or undue degradation of lands during operations.

VII. FINANCIAL WARRANTY

A financial warranty must be provided for the cost of reclamation of the disturbance described in this Notice. The prospector can either file a "One Site Prospecting Financial Warranty" or a "Statewide Financial Warranty." **The financial warranty must be submitted and approved by the Division prior to entry upon lands for the purpose of prospecting.**

An One-Site Prospecting Financial Warranty is usually filed by individuals or companies where prospecting activities are limited to a single area. It must be filed in the amount of \$2,000 per acre for land to be disturbed, or such other amount as determined by the Division, based on the projected costs of reclamation. A Statewide Financial Warranty is usually filed by companies with multiple prospecting sites. It must be filed in an amount equal to the estimated cost of reclamation per acre of affected land for all anticipated sites statewide. (You may increase the Statewide bond at any time in order to cover additional or expanded prospecting activities.)
