**Re: Dawson Mine, Permit No. M-1977-392, Documentation of Corrective Action(s) Received**

Mr. Tibbetts,

The Division of Reclamation, Mining, and Safety (Division) received your response on September 22, 2014 regarding the Problem(s) identified in the inspection conducted at the Dawson Mine on June 03, 2014. The status of the Corrective Action(s) associated with this Problem is as follows:

**Corrective Action #1: The Operator shall provide photo documentation to the Division verifying erosion gullies and ruts have been repaired, and that the site has been reconstructed and stabilized to prevent erosion damage by the corrective action date.**

The Operator submitted photographs showing the erosion damage has been repaired by grading and terracing. Therefore, this Problem is considered abated. However, the Division recommends the Operator continue to monitor and repair erosion as it occurs in the permit area, and work to maintain any stormwater management structures.

If you need additional information or have any questions, please contact me at the Division of Reclamation, Mining and Safety, 1313 Sherman Street, Room 215, Denver, CO 80203, by telephone at 303-866-3567, x8129, or by email at [amy.eschberger@state.co.us](mailto:amy.eschberger@state.co.us).

Sincerely,

Amy Eschberger  
Environmental Protection Specialist

CC: Tom Kaldenbach, DRMS
