Good Morning Mr. Cunningham,

We spoke last week about a mining claim on forest service 274 in Park County. This site is big holes all over. Many members in our community have complained to me about the devastation of our public lands.

I am concerned that someone could fall into one of these open pits and be injured. A lot of our members use this trail including children for ATV rides. I sits right next to the road. He digs more pits and doe's not fill any back in. If you enter his claim while he's there he will go after you and tell you that your trespassing. I thought this land is open to the public. As long as you don't pick anything up. He has mineral rights only. Here are some pics of the site as well as claim info.

I look forward to meeting you and will take you to the site.

Name of Discoverer : Atomic Perfection Inc. No address shown

Name of claim : Wild Blue Indian Load

Location of Claim : SW quarter of section 4, Township 125 or 12S, Range 71W, of the 6th Meridian, in the County of Park.
