RE: Shaffers Crossing; DRMS File No. M-1978-208; Annual Reporting Requirements

Dear Ms. Moores,

On February 2, 2007, the Division of Reclamation, Mining and Safety (Division) issued a conditional approval of Technical Revision No. 3 (TR-03) which revised the mine plan to incorporate a stable highwall configuration. As a part of the conditional approval, the Operator is to create a separate geotechnical section in each annual report which describes rock discontinuities such as joints exposed by blasting and quarrying during the report year.

A review of the 2014 Annual Report which was submitted on August 8, 2014 found that the geotechnical section was missing. As required by the conditional approval of TR-03, the Division requests that you provide the geotechnical exhibit for the last reporting period. Please submit the geotechnical information on or before December 31, 2014.

If you have any questions, you may contact me at (303)866-3567 x8116.

Sincerely,

Michael A. Cunningham
Environmental Protection Specialist
