Re: The Shores, Permit M1998-013, Technical Revision Approval, Revision TR02

Mr. Johnson:

On November 13, 2014 the Division of Reclamation, Mining and Safety approved the Technical Revision application submitted to the Division on October 15, 2014, addressing the following:

Revision to Mine Plan for Burch parcel (Pond E) and corresponding bond increase.

The terms of the Technical Revision 2 approved by the Division are hereby incorporated into Permit M1998-013. All other conditions and requirements of Permit M1998-013 remain in full force and effect.

The additional bond submitted with this revision in the amount of \$274,324 brings the total bond held for this site to \$2,039,395.70. It would very likely be in Bestway Concrete's interest to meet with DRMS soon to recalculate the total bond required for this site at this time – especially if the SEO has approved the slurry walls in Ponds A-D.

If you have any questions, please contact me.

Sincerely,

Eric C. Scott
Environmental Protection Specialist
