

P-2013-004  
RELEASE REQUEST SL-1

Request for reclamation responsibility release.  
12-14-2014

This letter is a request to release the financial warranties submitted to the department for the Boulder Gold Project, NOI # P2013004, project completed in September of 2013 as it was stated in the NOI. San Juan Minerals LLC has completed the prospecting agreement and reclamation as required. All grading was returned to its original state, topsoil that was stockpiled was spread and a seed mixture approved by the National Forest Service was broadcast over topsoil. The Conejos Ranger District official Andrea Jones was able to visit the site in late September of 2013 and was pleasantly surprised how well the site looked after reclamation. After visiting the site this past summer, with the corralling of livestock in the area, and several change of seasons that had taken place, it would be hard to find the place of activity without knowing exactly where it took place as all evidence of work is non existent. I have personally called the Durango Office several times after the completion of prospecting to inspect the site. I have been informed that due to staff reduction that it has been difficult, and was later informed that I needed to provide this document to initiate this process. I do apologize for the tardiness of this letter. I have emailed pictures of the reclaimed site to Robert Oswald in the Durango Office as printing pictures does waste ink.
