**Re: WRC Wet Pit, File No. M-2014-063, Receipt of Incomplete 112 Construction Materials
Reclamation Permit Application, Second Adequacy Review**

Dear Mr. Joy:

The Division of Reclamation, Mining and Safety has reviewed the response to the preliminary adequacy review for the above referenced 112c permit application. A review of the submitted materials has revealed a few more clarifications and issues that need to be addressed.

1. Please provide revised pages 5 and 11 of the original submitted mining plan that accurately describes where the topsoil stockpile locations will be located during the mining process. Also, item 8 on page 11 states that there is a 4th phase of the proposed operation, please correct or omit this statement on the revised mine plan.

Other issues may arise from other agency comments, and as more information is supplied. This application cannot be approved until the issues brought forth are adequately addressed. Please submit a response to the issues as soon as possible, but no later than March 27, 2015 so the decision due date set for March 27, 2015 can be met. If your response or a written extension request are not received by March 13, 2015 this application may be denied.

If you need additional information, please contact me at the Division of Reclamation, Mining and Safety, Grand Junction Field Office, 101 S. 3rd St., Suite 301, Grand Junction, Colorado 81501, telephone no. 970.241.2042.

Sincerely,

Travis Marshall
Environmental Protection Specialist II
