**Re: Raymond Enderson Pit, Permit No. M-2000-066, Technical Revision No. 4 (TR-04)
Adequacy Review-01**

Mr. DeWitt:

The Division of Reclamation, Mining and Safety (Division) has completed its adequacy review of your technical revision received on February 24, 2015. The decision date for this technical revision was recently extended to **April 03, 2015**. The Division appreciates your submittal of the extension request to allow more time for review.

After review of the information submitted, the Division has determined that the following additional information or modifications are required for approval of the revision:

- 1) The original Mining Plan Map submitted with the 110c application that was approved on June 27, 2000 shows a 200 ft mining setback from the Co Rd 41 ROW (see enclosed map). If this is a required setback, please add it to the revised Mining Plan Map. In addition, because the western permit boundary appears to be approximately 60 ft from the ROW, the 200 ft setback should be marked on site to help keep mining activities within the permit area at the appropriate setback distance.

This concludes the Division's adequacy review of your technical revision. Please remember that the decision date for this technical revision is **April 03, 2015**. If you are unable to provide satisfactory responses to any inadequacies prior to this date, **it will be your responsibility to request an extension of time to allow for continued review of this technical revision.** If there are still unresolved issues when the decision date arrives and no extension has been requested, the technical revision will be denied.

If you have any questions, please contact me at the Division of Reclamation, Mining and Safety, 1313 Sherman Street, Room 215, Denver, CO 80203, by telephone at 303-866-3567, x8129 or by email at amy.eschberger@state.co.us.

Sincerely,

Amy Eschberger

Environmental Protection Specialist
