**Re: C & D Farms No. 2, Permit No. M-1999-043, Technical Revision No. 4 (TR-04)  
Adequacy Review-01**

Mr. DeWitt:

The Division of Reclamation, Mining and Safety (Division) has completed its adequacy review of your technical revision received on February 24, 2015. The decision date for this technical revision was recently extended to **April 03, 2015**. The Division appreciates your submittal of the extension request to allow more time for review.

After review of the information submitted, the Division has determined that the following additional information or modifications are required for approval of the revision:

- 1) The original Mining Plan Map submitted with the 110c application that was approved on May 15, 1999 shows a 220 ft mining setback from the Co Rd 46 ROW (see enclosed map). If this is a required setback, please add it to the revised Mining Plan Map.

This concludes the Division's adequacy review of your technical revision. Please remember that the decision date for this technical revision is **April 03, 2015**. If you are unable to provide satisfactory responses to any inadequacies prior to this date, **it will be your responsibility to request an extension of time to allow for continued review of this technical revision**. If there are still unresolved issues when the decision date arrives and no extension has been requested, the technical revision will be denied.

If you have any questions, please contact me at the Division of Reclamation, Mining and Safety, 1313 Sherman Street, Room 215, Denver, CO 80203, by telephone at 303-866-3567, x8129 or by email at [amy.eschberger@state.co.us](mailto:amy.eschberger@state.co.us).

Sincerely,

Amy Eschberger  
Environmental Protection Specialist
