RE: Eureka Saturday Night Project, File No. P-2015-001 , NOI Application Adequacy Review

Dear Mr. Fine:

The Division of Reclamation, Mining and Safety (Division) is in the process of reviewing the above referenced application in order to ensure that it adequately satisfies the requirements of the Colorado Mined Land Reclamation Act (Act) and the associated Mineral Rules and Regulations of the Colorado Mined Land Reclamation Board for Hard Rock, Metal, and Designated Mining Operations (Rules). During review of the material submitted, the Division determined that the following issue(s) of concern shall be adequately addressed before the application can be considered for approval.

1. Please provide the USFS approved seed mix in pounds live seed per acre for each plant species.
2. The reclamation plan states that the proposed access road will be returned to its preexisting condition. Will the pit run and road base material, used for construction of the proposed access road, be removed from the site during reclamation?

Please submit your response(s) to the above listed issue(s) within sixty days of the mailing date of this letter.

The Division will continue to review your application and will contact you if additional information is needed.

If you require additional information, or have questions or concerns, please contact me at the Division's Grand Junction Field Office.

Sincerely,

Dustin Czapla
