RE: Sheehan Pit, Permit No. M-2007-058, Inspection Problem Abated

Dear Mr. Corson:

On July 8, 2015 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Several issues were noted as problems with corrective actions and dates. Problem 1 (one), identified in the inspection report, documented improper oil storage and a spill. On August 3, 2015 the Division received photo documentation via email that the toxic materials (petroleum products) that were improperly stored have been removed. This satisfies the corrective actions for Problem 1 (one) and it is considered abated.

Other photos submitted also noted that miscellaneous equipment pieces that were stored outside to the permit area have been removed. Additional off-site damage issues remain which must be addressed before the Mined Land Reclamation Board. So Problem 4 (four) cannot be fully resolved at this time, but the Division appreciates your efforts to rectify what can be accomplished.

If you require additional information, or have questions or concerns, please feel free to contact me. Amy Yeldell, at the Division of Reclamation, Mining and Safety, 1313 Sherman St., Room 215, Denver, CO 80203. Direct contact can be made by phone at 970-254-8511 or via email at amy.yeldell@state.co.us

Sincerely,

Amy Yeldell
