**Re: Project, Permit No. M-1980-244;  
Technical Revision (TR-77) Approval**

Dear Mr. Henris:

On October 9, 2015 the Division of Reclamation, Mining and Safety approved the Technical Revision application submitted to the Division on September 25, 2015, addressing the following:

*Relocate substation*

The terms of the Technical Revision No. 77 approved by the Division are hereby incorporated into Permit No. M-1980-244. All other conditions and requirements of Permit No. M-1980-244 remain in full force and effect.

The Division has reviewed this minor change for impacts to the financial warranty. The \$9,750 reclamation cost estimate submitted with TR-77 was determined to be acceptable. The performance bond currently held by the Division is in the process of being updated by the Division's Financial Assurance Specialist as a result of the recent change in management at CC&V. When the update process is complete, the Division will send CC&V a letter informing you of the current surplus bond. Please note TR-76 submitted on September 25, 2015 is currently under review and will likely also have an impact on the financial warranty.

If you have any questions or need further information, please contact me at (303)866-3567 x8169.

Sincerely,

Timothy A. Cazier, P.E.  
Environmental Protection Specialist
