Re: Red Canyon Quarry, Permit No. M-1985-043, Technical Revision Approval, Revision No. TR-3

Dear Mr. Mangone:

On November 25, 2015 the Division of Reclamation, Mining and Safety approved the Technical Revision application submitted to the Division on August 24, 2015, addressing the following:

Provide Geotechnical Stability Exhibit & Update Blasting Plan

The terms of the Technical Revision No. 3 approved by the Division are hereby incorporated into Permit No. M-1985-043. All other conditions and requirements of Permit No. M-1985-043 remain in full force and effect. The Division acknowledges the commitment made in the last paragraph of the November 6, 2015 Response to DRMS Technical Review of Highwall Study to:

Submit a detailed final highwall plan for the southeast corner of the permit area once factors critical to decision making regarding mining of this area have been clarified for Division review and approval.

The Division has reviewed this change for impacts to the financial warranty and has determined that this change does not require an increase to the current reclamation liability.

If you have any questions, please contact me.

Sincerely,

Timothy A. Cazier, P.E.
Environmental Protection Specialist
