RE: Blue Pit, Permit No. M-1981-207, Inspection Problem Abated

Dear Mr. Mellow

On October 28, 2015 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Availability of Records was cited as a problem. Corrective actions required you to submit a technical revision request to clarify the number of acres that should have been added upon the approval of AM-1. On December 17, 2015 the Division received a technical revision request to clarify the permitted number of acres. On December 23, 2015 that technical revision TR-7 was approved. This satisfies the corrective actions it is considered abated.
