***RE: Mid-Continent LST, Permit No. M-1982-121, Inspection Problem Abated***

Dear Mr. Babin:

On October 26, 2015 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Acid and toxic materials was cited as a problem in the inspection report for improper storage and containment of fuels and/or other hazardous materials present on site. Corrective actions required that all storage tanks, petroleum and any hazardous materials on site for any period of time shall have appropriate secondary containment. The operator shall supply photo documentation that any fuel or hazardous materials containers are stored properly - including applicable secondary containment structures by the corrective action date. The operator may also provide photo documentation that all containers have been removed from the site on or before the corrective action date.

On January 11, 2016 the Division received photo documentation via email that the toxic materials (petroleum products) that were improperly stored have been removed. As well as a letter attesting that they were all removed since snow cover abstracted most of the photo. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me. Amy Yeldell, at the Division of Reclamation, Mining and Safety, 1313 Sherman St., Room 215, Denver, CO 80203. Direct contact can be made by phone at 970-254-8511 or via email at amy.yeldell@state.co.us

Sincerely,

**Amy Yeldell**
