RE: Juniper Quarry, Permit No. M-1982-141, Corrective Action Extension Request Approval

Dear Mr. Anson:

The Division of Reclamation Mining and Safety (Division) inspected the above mentioned site on November 24, 2015. General compliance with mine plan was cited as problem. Corrective actions required that the operator submit in the form of a technical revision an updated and clarified mining and reclamation plan, as well as all correlating maps. The corrective action due date was set for March 10, 2016.

On February 11, 2016 the Division received an extension request from Mr. Anson. Due to the unseasonably snowy weather he has been unable to complete the field work necessary to finish the technical revision. The Division is approving the extension request.

To avoid potential future enforcement actions for non-compliance with State Statutes, Rules and Regulations, and/or conditions specified in your permit for this site, you must submit compliance documentation with the corrective actions specified by **Tuesday, May 31, 2016.**

If you require additional information, or have questions or concerns, please feel free to contact me.
