

# Figure 5

Surface Water analytical results for Windy Gulch for May 3, 2016

Sample Locations:

- 1) WGL
- 2) 9360 Basin
- 3) 9700 Weir
- 4) WGU

Refer to Map G-3, Appendix 4 for sample locations.

Windy Gulch is an ephemeral stream and typically only flows in the spring (April/May) in years when there is sufficient snow pack to create runoff.
