Dear Mr. Duran:

On July 19, 2016 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Revegetation was cited as a due to the presence of state listed noxious weeds, specifically Tamarisk. Corrective actions required all Tamarisk trees be removed and photo documentation be provided corrective action date.

On October 25, 2016 the Division received the above mentioned documentation. This satisfies the corrective action and it is considered abated.
