RE: Stegner Farms – M-1999-021 Technical Revision

Dear Mr. Cunningham:

Pursuant to the original reclamation plan for the Stegner Farms Pit, there were to be two (2) lakes with a dike between them. We are hereby requesting a technical revision to the plan to allow for one (1) larger lake with 2 small islands for Wildlife Habitat. The original plan also required the temporary berms on the north and west sides to be removed. We would now prefer to leave the berms and maintain them. Thank you for your time and help in this matter.

Sincerely,

Cody Wooldridge, CWP
Special Projects Manager
Water Valley Land Company

COLORADO DIVISION OF RECLAMATION, MINING AND SAFETY

1313 Sherman Street, Room 215, Denver, Colorado 80203 ph(303) 866-3567

REQUEST FOR TECHNICAL REVISION (TR) COVER SHEET

File No.: M- 1999-021 Site Name: Stegner Farms

County Larimer TR# _____ (DRMS Use only)

Permittee: Trollco Inc.

Operator (If Other than Permittee): _____

Permittee Representative: Cody Wooldridge

Please provide a brief description of the proposed revision: _____

We want to leave the site as is with one large lake with two small islands. The berms that are along the north and west ends will stay and be maintained for weed control.

As defined by the Minerals Rules, a Technical Revision (TR) is: "a change in the permit or application which does not have more than a minor effect upon the approved or proposed Reclamation or Environmental Protection Plan." The Division is charged with determining if the revision as submitted meets this definition. If the Division determines that the proposed revision is beyond the scope of a TR, the Division may require the submittal of a permit amendment to make the required or desired changes to the permit.

The request for a TR is not considered "filed for review" until the appropriate fee is received by the Division (as listed below by permit type). Please submit the appropriate fee with your request to expedite the review process. After the TR is submitted with the appropriate fee, the Division will determine if it is approvable within 30 days. If the Division requires additional information to approve a TR, you will be notified of specific deficiencies that will need to be addressed. If at the end of the 30 day review period there are still outstanding deficiencies, the Division must deny the TR unless the permittee requests additional time, in writing, to provide the required information.

There is no pre-defined format for the submittal of a TR; however, it is up to the permittee to provide sufficient information to the Division to approve the TR request, including updated mining and reclamation plan maps that accurately depict the changes proposed in the requested TR.

Required Fees for Technical Revision by Permit Type - Please mark the correct fee and submit it with your request for a Technical Revision.

<u>Permit Type</u>	<u>Required TR Fee</u>	<u>Submitted</u> (mark only one)
110c, 111, 112 construction materials, and 112 quarries	\$216	<input checked="" type="checkbox"/>
112 hard rock (not DMO)	\$175	<input type="checkbox"/>
110d, 112d(1, 2 or 3)	\$1006	<input type="checkbox"/>
