Michael, I am asking for an extension to submit my weed control plan and my letter of temporary cessation until December 15, 2016. I have potential buyers that are here today (Nov.3,2016) that are putting up earnest money and signing a contract to purchase Rock-N-Pine from me.They would like to be able to do some testing in small quantities. I don't know how it works for sure if the mine is in temporary cessation if my potential buyers would be able to test or not, but I would like to have the opportunity to sell this land with out being in violation with the state.I have worked on my weed control plan and have it pretty much got it figured out with park county conservation district,by spraying weeds twice a year with a chemical called Milestone once in the spring and once in the fall. If this is ok I would really appreciate it and hopefully this will end mine and Todd Sullivans controversy that you all have been drug into for the past few years.

Thank you Mark Balderston
