Re: Lyons Quarry - Permit No. M-1977-141 – Technical Revision No. 2
Decision Date Extension Request

Dear Michael:

The current decision date for TR-2 is November 30, 2016. Aggregate Industries (AI) received draft responses to the Division's first and second adequacy review items from its engineering consultants, HDR over the weekend and met to review those responses with HDR yesterday. HDR is currently making a few revisions to the responses and anticipates submitting those responses to the Division by November 30; however, we realize that does not provide the Division sufficient time to review and make a decision.

As previously discussed, AI will not be able to commence activities associated with TR-2 until site access is restored via the Old St. Vrain Bridge, which was destroyed during the September 2013 flood event. The most recent information available from Boulder County indicates that the 90% construction plan set has been completed (uploaded to their website October 18) and that construction is still planned to commence in early 2017 (February).

As we just discussed by phone, AI is requesting an extension of the decision date to February 28, 2017 which we anticipate will allow adequate time for sufficient review of responses to current adequacy items and as well as any subsequent questions or concerns the Division may have.

Thank you for your consideration.

Very truly yours,

A handwritten signature in blue ink that reads "Connie N. Davis".
