**Technical Revision No. 4 – Logistical Assessment and Removal Action Plan and Specifications -  
Hukill Gulch Millsite Permit # M-2009-076  
Request for extension of time to allow for continued review.**

Dear Mr. Cunningham,

Venture Resources Inc. hereby requests an extension of time to allow for continued review of Technical Revision #4 to the Hukill Gulch Millsite, Permit # M-2009-076.

The additional data requested by the DRMS will require significant on-site work, including bringing in contractors for consultation and cost estimates, identifying the adjacent material to be used in the construction of the lower-level working platform and preparing a map of the facility.

Due to the location of the facility, down in a canyon and off the winter non-maintained county road one and one half miles, the facility is generally non-accessible until spring.

Therefore Venture Resources requests an extension of time until May 30, 2017.

Thank you for your consideration.

Yours truly,

Patrick D. Maher, President  
Venture Resources Inc.
