On January 10, 2017 the Division of Reclamation, Mining and Safety approved the Amendment application submitted to the Division on August 5, 2015, addressing the following:

Change the method of lining the reservoir from slurry wall to compacted clay liner and add an additional clay lined reservoir to the northeast portion of the site.

The terms of the Amendment No. 1 approved by the Division are hereby incorporated into Permit No. M-2010-071. All other conditions and requirements of Permit No. M-2010-071 remain in full force and effect.
