Thank you Mr. Neinhueser,

The corrective actions requirements from the Divisions December 15, 2016 inspection for the Schumacher II pit (M-2001-018) is considered abated at this time. I plan on conducting several other inspections near this site on Thursday February 16. I plan on stopping in at this site; likely around noon, to check on the corrective actions and observe the reclamation.

Thank you,

Jared
