Re: Ignacio Pit, Permit No. M-1977-446 Technical Revision Application TR-1

Mr. Hocker:

On February 6, 2016, the Division of Reclamation, Mining and Safety received your response to the Division's preliminary adequacy review for TR-1. The revision requested addresses the following items:

- *Allowing for the importation of offsite fill material to be used on site*

The documentation received appears to be incomplete. The documents received were pages 3 and 4 of an analytical report that provided no details of the material sampled. Please submit the entire report, as well as documentation on **how** Badger Daylighting will certify that all materials to be dumped on site is non-hazardous.

Please submit the requested information by the decision due date of March 1 2017.. Or your Technical Revision application will be denied and need to be re-submitted. Please feel free to contact me if you have any further questions.

Sincerely,

Lucas J. West
