Thank you Betty,

I have scanned these pictures into the files for this site. The corrective action required from the December 15, 2016 inspection is considered abated at this time. Thank you for addressing this issue.

The reclamation looks good from the photos, we recommend that once you guys have seeded the site, please continue to monitor the area for noxious weeds and erosion and take corrective action if necessary. Once the vegetation is established and the site is stable, I would recommend pursuing final site release.

Thank you,

Jared
