RE: Colona Pit M-1994-005 – Technical Revision Adequacy Response

Mr. Czapla:

In response to your adequacy questions dated April 24th, Oldcastle has the following information to provide:

1. Statement that the 24" thickness of backfill material to be placed above the irrigation/groundwater level will be the thickness after settling/compaction.

Oldcastle will place at least 24" of backfill above the irrigation/groundwater level, as measured after settling/compaction.

2. Rangeland seedmix to be used on the Jutten property, including species and pounds live seed per acre seed rate.

The following dryland seed mix will be used on the Jutten property:

| Species | Lbs per Acre (PLS) |
|-----------------------|---------------------------|
| Indian Ricegrass | 7 |
| Streambank Wheatgrass | 3 |
| Orchard Grass | 1 |
| Galleta | 3 |
| Total | 14 |

CC: Pete Siegmund, Oldcastle

Please contact me with any further questions.
