Mr. Cunningham,

I have confirmed with Sarah Brucker of DWR (Denver) that the Gloria Z mine M1984094 at Fairplay has no current or approved SWSP, and has not had one since 2014.

This mine has exposed groundwater.

I understand that operation without an approved SWSP and exposed groundwater should result in immediate cessation of excavation below water level and cessation of use of any water at the mine.

I trust that if DRMS is responsible for halting operations at this mine due to the above, you will do so immediately.

Regards,
Robin Rindsig
