Michael,

It has come to my attention that the Gold Rush guys have determined that a beaver dam/lodge at the Beaver Ponds Environmental Education Center is inhibiting water flow down Sacramento Creek (a water source for Gloria Z and Katuska).

Their intention is to have Critter Control trap and destroy the beavers and destroy the lodge and dam.

Supposedly, this is legally allowed per ancient water use for mining law.

I find this a [REDACTED] shame, since they cannot utilize the ponds at Katuska right now due to the cease and desist order, and since they are operating without a SWSP at Gloria Z, they should be prohibited from using any water there.

So, due to the arrogance and greed of the actors/miners, the very thing that the BPEEC is all about, beavers, are going to be slaughtered.

This just isn't right.
