RE: Lyons Quarry; DRMS File No. M-1 977-141; Technical Revision No. 2;
Responses to DRMS Comments in Adequacy Review No. 4;

Dear Michael,

This letter documents our response to the Division's comment in Adequacy Review No.4, dated April 4, 2017. For completeness, we have included the original DRMS comment, followed by our response in italics.

6.4.6 Exhibit F – Reclamation Plan Map

1. The Reclamation Plan Map outlines an area of 59.6 acres. The Reclamation Plan Map must be revised to depict the entire area which corresponds with the permit area of 71 acres. Please reference the Reclamation Plan Map which was submitted under Amendment No. 2 for the most recently approved permit boundary configuration.

Response:

Exhibit F – Reclamation Plan Map is revised to depict the entire area corresponding to the 71 acre permit area submitted under Amendment No. 2.

We hope that the above response and attached Exhibit F satisfactorily address the comment provided in the Division's Adequacy Review No. 4.

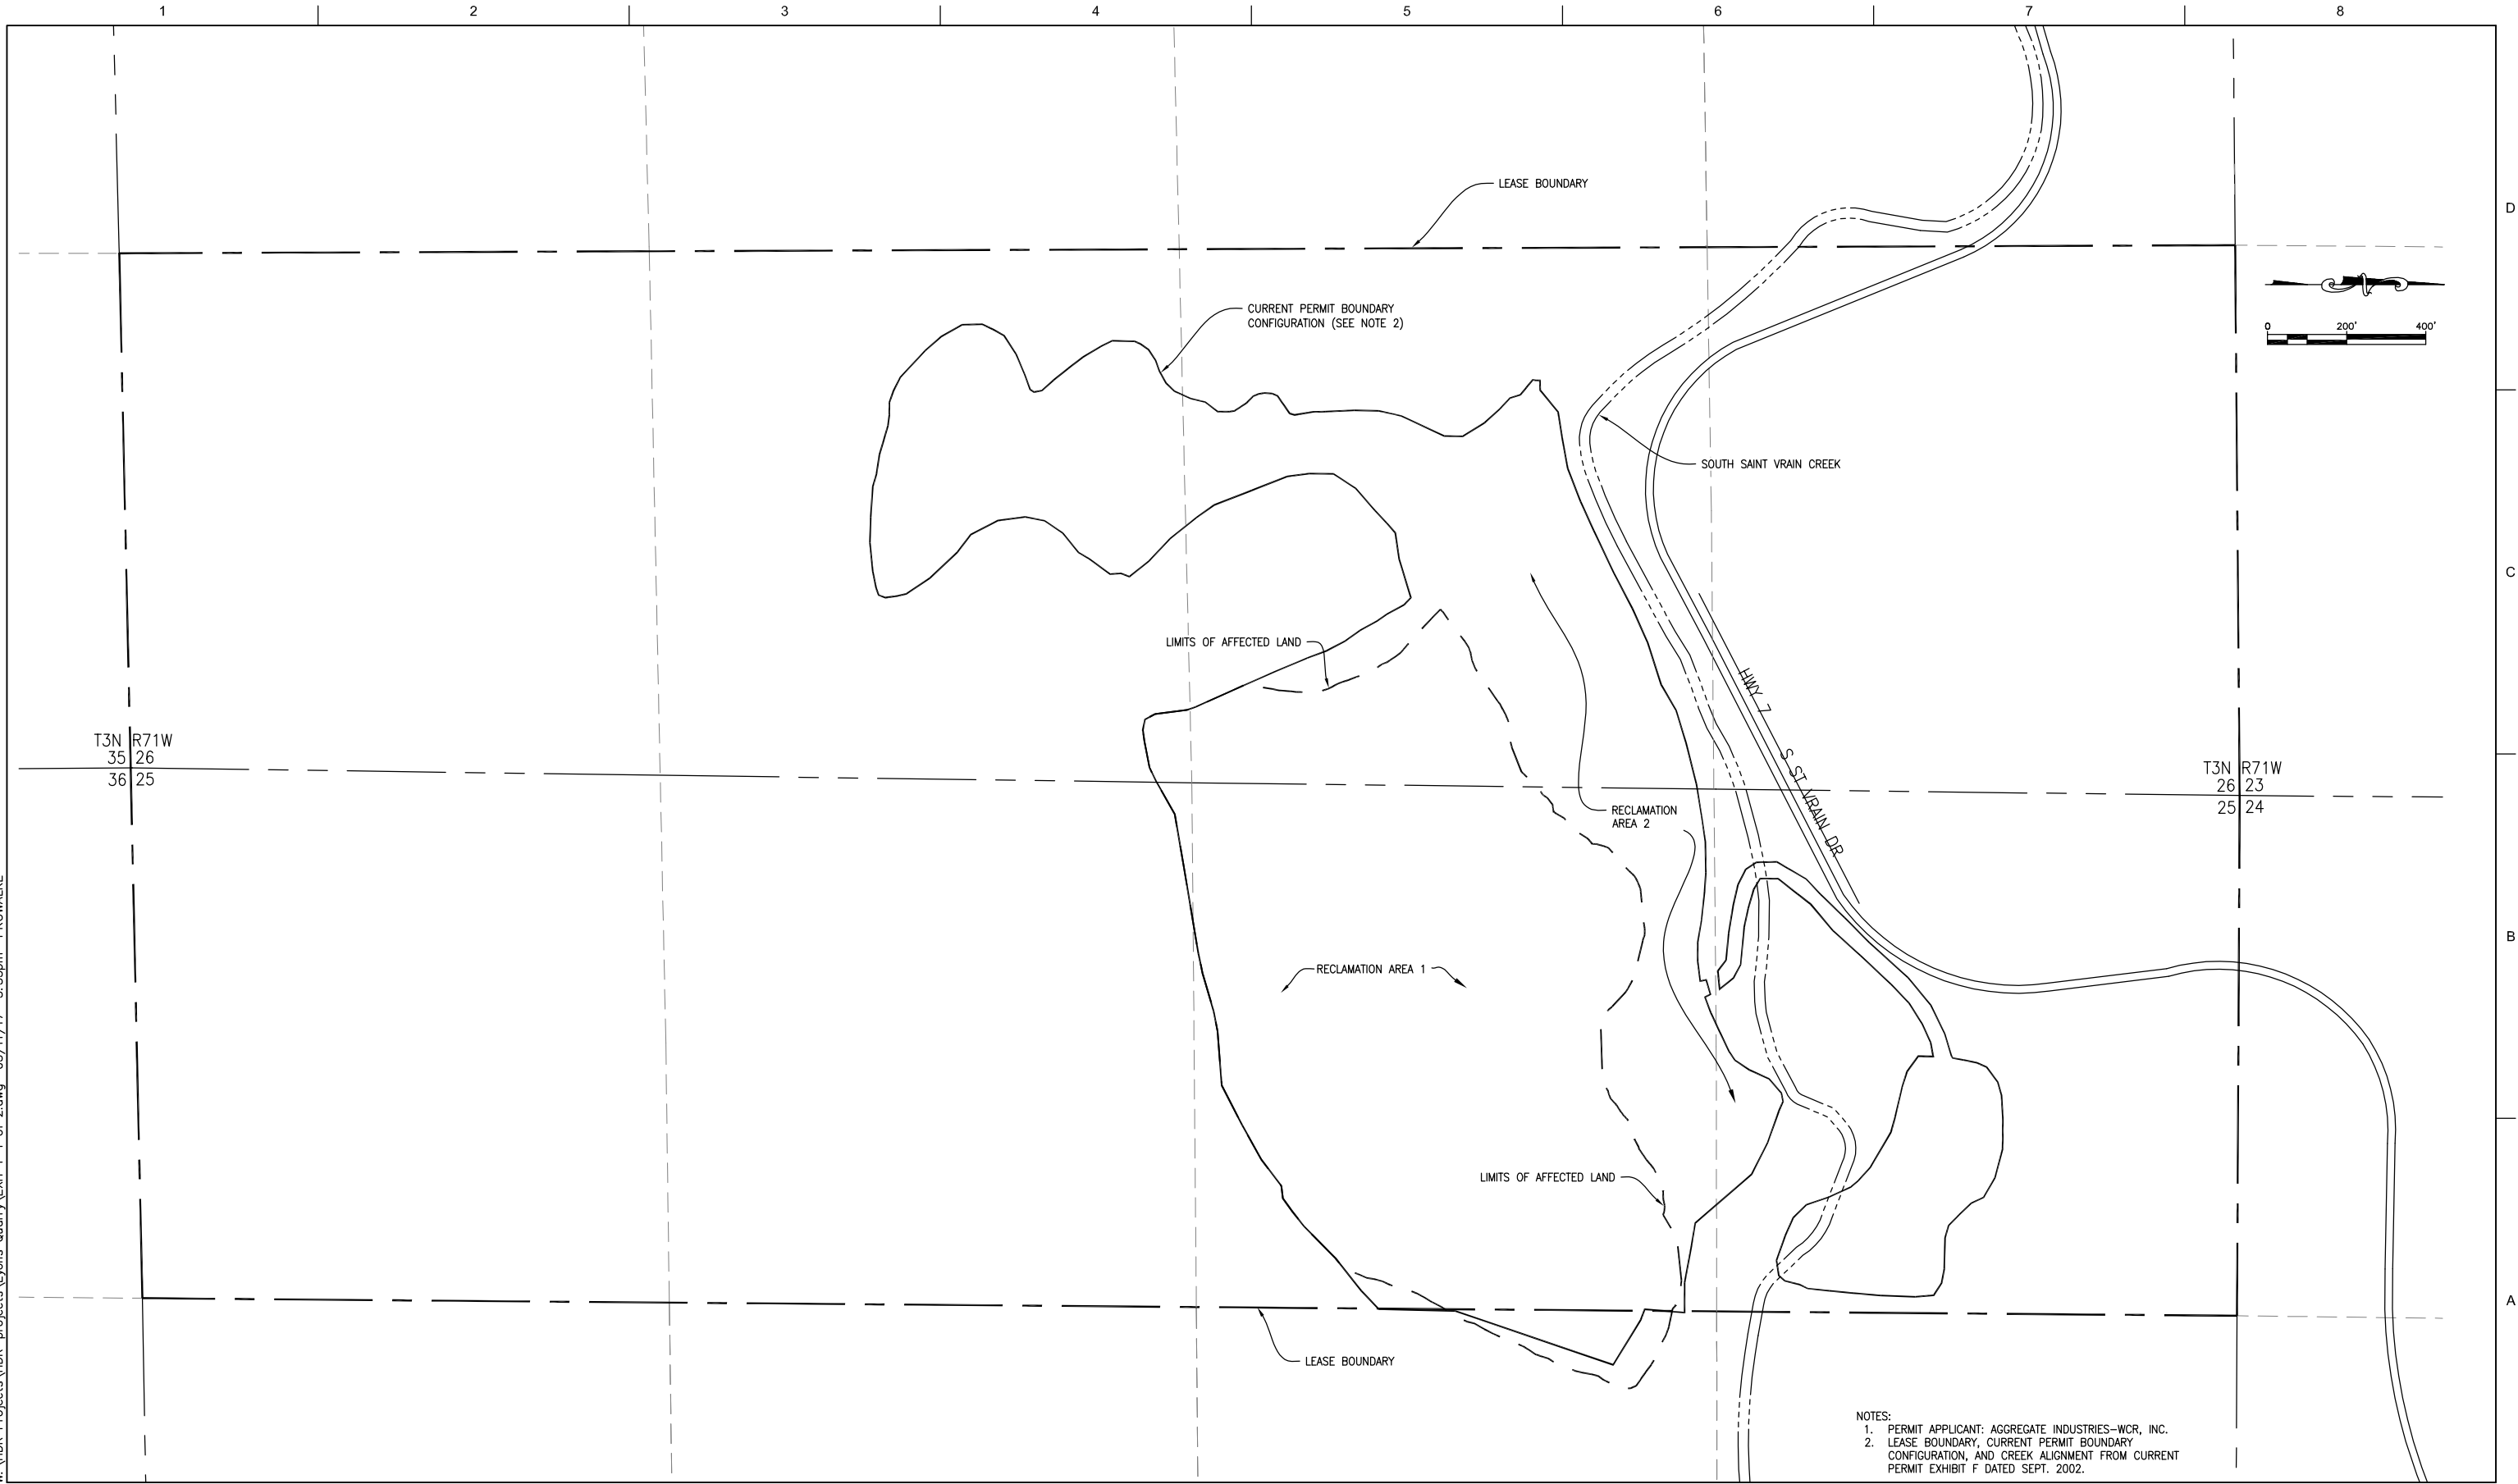

Sincerely,
HDR
