Re: Golden Wonder Mine, Permit No. M-1978-091-UG, Technical Revision Application, TR-3, Preliminary Adequacy Review.

Mr. Abraham:

On June 2, 2017, the Division of Reclamation, Mining and Safety completed the preliminary adequacy review of **TR-3** for the Golden Wonder Mine Permit No. **M-1978-091-UG**. The revision requested addresses the following items: *Minor improvements/enhancements to the existing mine water treatment system. Replacing limestone in passive system with more effective materials and adding a small pre-treatment sump on the edge of the existing mine pad.* A few clarifications must be received before the revision can be approved and implemented. Please address the following items:

- Figure 4 displays a $\frac{3}{4}$ " plywood base. This is a concern due to wood products being susceptible to rotting in a wet setting. Please propose a different material that is resistant to degradation.
- Please clarify how often the system will require maintenance. Also, what frequency will the slag require replacement. Where will the spent slag be disposed of?
- Will any undesirable byproducts be introduced from the slag into Dead Man Gulch?
- The Enviro-Chem Analytical, Inc. study states that the slag acquired from Harsco Pueblo Slag Company is effective. It was also stated that steel slag products vary greatly and the study is specific to the Harsco slag. Is Harsco able to provide additional slag for a long period of time for the proposed treatment system maintenance?
- Please commit to testing material on a bench scale prior to field use if a different source other than Harsco is needed to provide slag for the treatment system.

The decision date for the technical revision has been set for July 3, 2017. Please provide a response to the questions or a request to extend the decision date no later than June 26, 2017. If a response or an extension is not received by June 26, 2017 the request may be denied.

If you need additional information, please contact me at the Division of Reclamation, Mining and Safety, Grand Junction Field Office, 101 S. 3rd St., Suite 301, Grand Junction, Colorado 81501, telephone no. 970.241.2042.

Sincerely,

Travis Marshall
