BRANNAN SAND AND GRAVEL, TROUT VALLEY RANCH, M-2016-080  
Operator, Mine, and DRMS Permit Number

The following items are required for review by the Planning Director or designee before commencing any Mining activities. Mining is defined as an enterprise or operation involving underground or surface excavation for the purpose of extracting ore, mineral, rock, or other earthen materials, together with other activities often associated with mining, such as but not limited to, exploration, development, and milling, concentrating, refining, or other procedures designed to separate valuable products from waste material.

Within ten days after receipt of these items, the Planning Director or designee shall make an administrative determination as to whether or not the proposed operation meets all applicable requirements of these Land Use Regulations, has been issued all necessary State permits, and requires any additional 1041 permitting. This determination shall be given to you in writing and may be appealed to the Board of County Commissioners.

- ☒ Either a deed showing ownership of the mine or a notarized authorization from the owner to conduct a mining operation.
- ☒ Any permits required by the Colorado Division of Reclamation, Mining, and Safety. These will vary according to the scope of the proposed operation.
- ☒ Any permits required by the Colorado Division of Public Health and the Environment related to air and water quality.
- ☐ If the operation is to occur on Federal land, evidence that all requirements of the land management agency have been met.
- ☒ A narrative description of the proposed operation, including the materials mined for, the method of extraction, the proposed length of the operation, and a description of any on-site processing. The description should also include the number of people engaged in the operation, the hours of work, the estimated number of vehicle trips per day, and methods for disposal of all waste generated.
- ☒ A site plan showing all existing and proposed aboveground activities, structures, and improvements. The site plan should include lighting, signs, and distances from any nearby residential structures.

The above items have been reviewed, and the proposed operation is in apparent compliance with all applicable local, state, and federal requirements.

JOHN DEGENS, AICP : Planning Director or Designee JUNE 15<sup>th</sup> 2017
