RE: **Munsch Pit, Permit No. M-2000-018;**
Notice of Adequate Responses (CN-01)

Dear Ms. Brossman;

The Division of Reclamation, Mining and Safety (Division) received via email your response to our July 17, 2017 Second Adequacy Review (2AR) and has completed its review of those responses for your 112 construction materials reclamation permit conversion application. The Division has determined your responses are adequate and we require no additional information for this revision application.

As you are aware, an acreage release request was required to remove the existing access road from the permit. The Division approved that request on July 26, 2017 and is required to wait 30 days for an appeal from that approval date (Friday, August 25, 2017) to finalize the acreage release. **The current decision date for this application is August 28, 2017.** If no appeal is received by the Division by the close of business on August 25th, the Division can approve the conversion on the following business day, August 28, 2017.

The Division received comment letters from the Division of Water Resources and the State Historical Preservation Office. Those letters are attached for your records. If you have any questions, please contact me at (303) 866-3567, ext. 8169.

Sincerely,

Timothy A. Cazier, P.E.
Environmental Protection Specialist
